

Transforming Messy Data: Tough Decisions, A New Vision, and Effective Processes

April 10, 2019

(Messy Data, Visual Scaling, and Effective Processes)

Twitter - #messydata

WELCOME (R)

Institutions collect data on students through a variety of strategies, for a variety of needs. We over collect data, seldom taking the time to consider programmatic implications. Educators need multiple supports to assist them in revisiting the purpose of assessment and evaluation through quality assurance processes.

WELCOME (R)

There are many tough questions & difficult decisions to be made. The answers to these require a cohesive and collaborative approach to create actionable information related to accreditation and quality assurance systems. This session explores tools and strategies to clean up #messydata to transform processes that guide organizations as they create and implement effective structures.

Overview (R)

- What is "Messy Data"? (5 min)
- How do You Know if Your Data is Messy? (15 min)
- IER – Reflection for Action (overview – 7 min, importance – 8)
- PIG and Knowledge Management (10 min)
- Ways to Fix Messy Data (10 minutes)
- Questions (5 mins)

PRESENTERS (R & M)

- Dr. Ray Francis
 - franc1rw@cmich.edu
 - Tenured Graduate Faculty
 - Department of Teacher Education and Professional Development
 - Long history in assessment, evaluation, and accreditation (NCATE, TEAC, CAEP, AAQEP) .
- Dr. Mark Deschaine
 - Tenured Graduate Faculty
 - Department of Educational Leadership
 - Member of Department and University Assessment and Academic Senate Committees

This is about *your* students!

This is about *your* program!

This is about *you*!

WHAT ARE YOUR TOUGH QUESTIONS? (M)

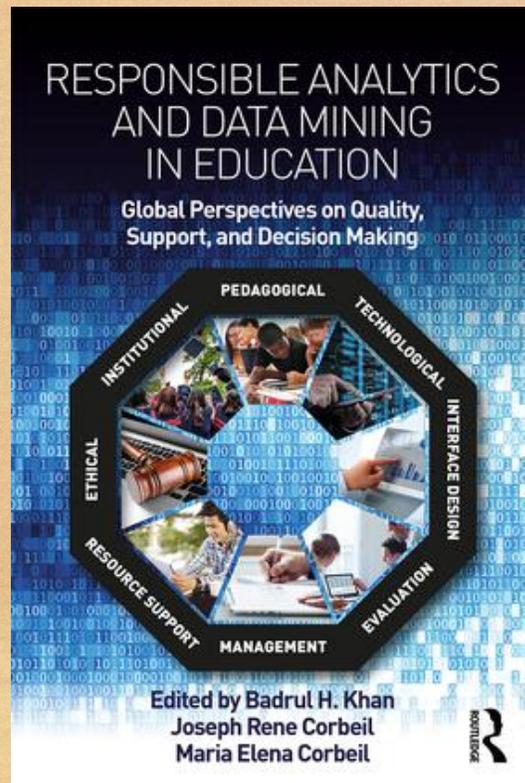

We are all working with assessment, evaluation, and accreditation issues. And we are all facing tough questions in our programs.

What are YOUR tough questions ???

Tough Questions, Difficult Decisions (M)

- Compliance or Improvement
- Standards
- Leadership and Structure
- Sensemaking
- Voice, Agency and Action
- Whose story is being told?
- How much is too much? How little is too little?

Resources to Consider (M)

IAP New Book Information

The Contemporary Superintendent: (R)Evolutionary Leadership in an Era of Reform

Editors: **Meredith Mountford, Florida Atlantic University** and **Leigh E. Wallace, University of Wisconsin-Milwaukee**

A volume in **Research on the Superintendency**
Series Editors: **Meredith Mountford, Florida Atlantic University** and **Leigh E. Wallace, University of Wisconsin-Milwaukee**

What is (R)Evolutionary Leadership? Why Does it Matter?

How can contemporary school district administrators, specifically superintendents, contend with so many difficult and almost impossible competing commitments? Building on the definitions of revolution, revolutionary, evolution, and evolutionary, the notion of (R)Evolutionary Leadership emerged while discussing the need for school district leaders to push back against the status quo while improving teacher and leadership practices, improving student learning outcomes, engaging with the community, and ensuring decision making processes that include check and balance systems that are just, fair, and equitable for all.

The chapters in this book introduce superintendents or research on superintendents in which these tenants were practiced; both in their ability to enact radical change by "overthrowing" the status quo – as well as evolutionary in their deliberate approach to viewing change as a process they can control over time. These leaders were willing to confront and defy practices and policies that were counter to student well-being and achievement while concurrently knowing how to reach their desired results. The chapters chosen for inclusion in this volume are those that offered a glimpse of these revolutionary tenants in practice.

Publication Date: 2019
ISBN:
Paperback: 9781641135245
Hardcover: 9781641135252
E-Book: 9781641135238
Paperback: \$65.99
Hardcover: \$85.99
Trim Size: 6.14 x 9.21
Page Count: TBD
Subject: Superintendents, Executive Leadership, School Boards, Policy Makers, Justice
ERIC Code: JMK

CONTENTS: (R)Evolutionary Leadership: An Innovative Response to Rapid and Complex Change, **Meredith Mountford and Leigh Ellen Wallace, Colorado School Superintendents: Meeting the Challenges of Leadership, Wendy A. WHAT ARE THE MESSY DATA AROUND THESE DECISIONS? (R)

Professional Judgement, Reflection & Action

I – Identify

E – Explore

R – Resolve

IER (Identify/Explore/Resolve) Process

Promoting Learning through the IER Model of Reflection

One of the most effective practices in the area of metacognition is that of Reflective Practice. Reflective Practice, or Reflection, as it is commonly referred, has been employed for many purposes in recent literature. Authors have included reflective processes in a variety of research and scholarly activities on teachers, teaching, and learners. Reflection has been defined and used in a discrete manner bounded by each author's particular area of interest. In this section the use of reflection in research is to examine and synthesize in order to develop a well-grounded general purpose for reflection. Reflective practice is a skill to be developed and refined in all professional areas (skillsyouneed.com, 2014).

Several authors have indicated that reflection can be used by individuals to organize experiences and build knowledge. Through reflection individuals engage in opportunities to examine experiences for the purpose of making future decisions in the future. Grimmett (1989) refers to as situational knowledge. The definition currently being used for situational knowledge, adapted from Grimmett's, is: the knowledge a professional possesses which may be employed in professional practice to make informed decisions.

Supporting faculty and instructors through Visual Scaling to enhance teaching and learning

Ray Francis  **Mark Deschaine** 

Organization(s): Central Michigan University, United States of America
Submitted by: **Ray Francis (Central Michigan University, US)**, ID: 1116
Presenting Author: Francis, Ray; Deschaine, Mark franc1rw@cmich.edu desch1me@cmich.edu

Topics: Assessment for Learning, Innovation in Evaluation, Teaching Practices to Support Experiential Learning, Understanding and supporting faculty and instructors

Keywords: Visual Scaling, support, data-based decisions, authentic

Session Description (400 words) and Elements of Engagement (150 words): As a part of the strand "Understanding and supporting faculty and instructors" the process for improvement and support for faculty and instructors must include an authentic and manageable system to collect, analyze, and communicate student learning/performance data to assist faculty and instructors, and administrators in the determination of support within any program in higher education. Visual Scaling provides the opportunity, as evidenced through the collected and analyzed data, to allow faculty and instructors, and administrators to easily explore meaningful and actionable data, and make effective decisions about support.

The effective identification of faculty and instructor supports is a key element in the ongoing improvement of instruction at all levels in higher education. The data must be reliable, valid, easily obtainable, authentic, and actionable on the part of the faculty and instructors, as well as by administrators. Visual Scaling, in the overall implementation of the process, provides for the collection of reliable, valid, easily obtainable, authentic, and actionable data that can be used to make effective decisions about support.

The Visual Scaling (VS) Process (M)

- Establishing a quantitative strategy for comparing data that are often times qualitative, subjective, or performance based in nature.

The Visual Scaling (VS) Process (R)

- Setting the zero-base. Yes, zero is a good thing.
- Set the performance ranges (-3, -2, -1, 0, 1, 2, 3) – no more than that.
- Collect, process, score, analyze your data

A sample scale (R)

- +3 = 98 – 100
 - +2 = 95 – 97
 - +1 = 87 – 94
 - 0 Zero-base = 64 – 86
 - -1 = 48 – 63
 - -2 = 18 – 47
 - -3 = 0 – 17
- Not equal across the ranges
 -
 - Not linear
 -
 - Irregular based on professional knowledge, etc.

Sample of 4 Administrations Data for Heterogeneous Group over Time (R)

	Admin 1	Admin 2	Admin 3	Admin 4
Group A	68	74	83	88
Group B	69	77	77	85
Group C	68	61	77	86
Group D	68	77	88	90
Overall	68.25	72.25	81.25	87.25

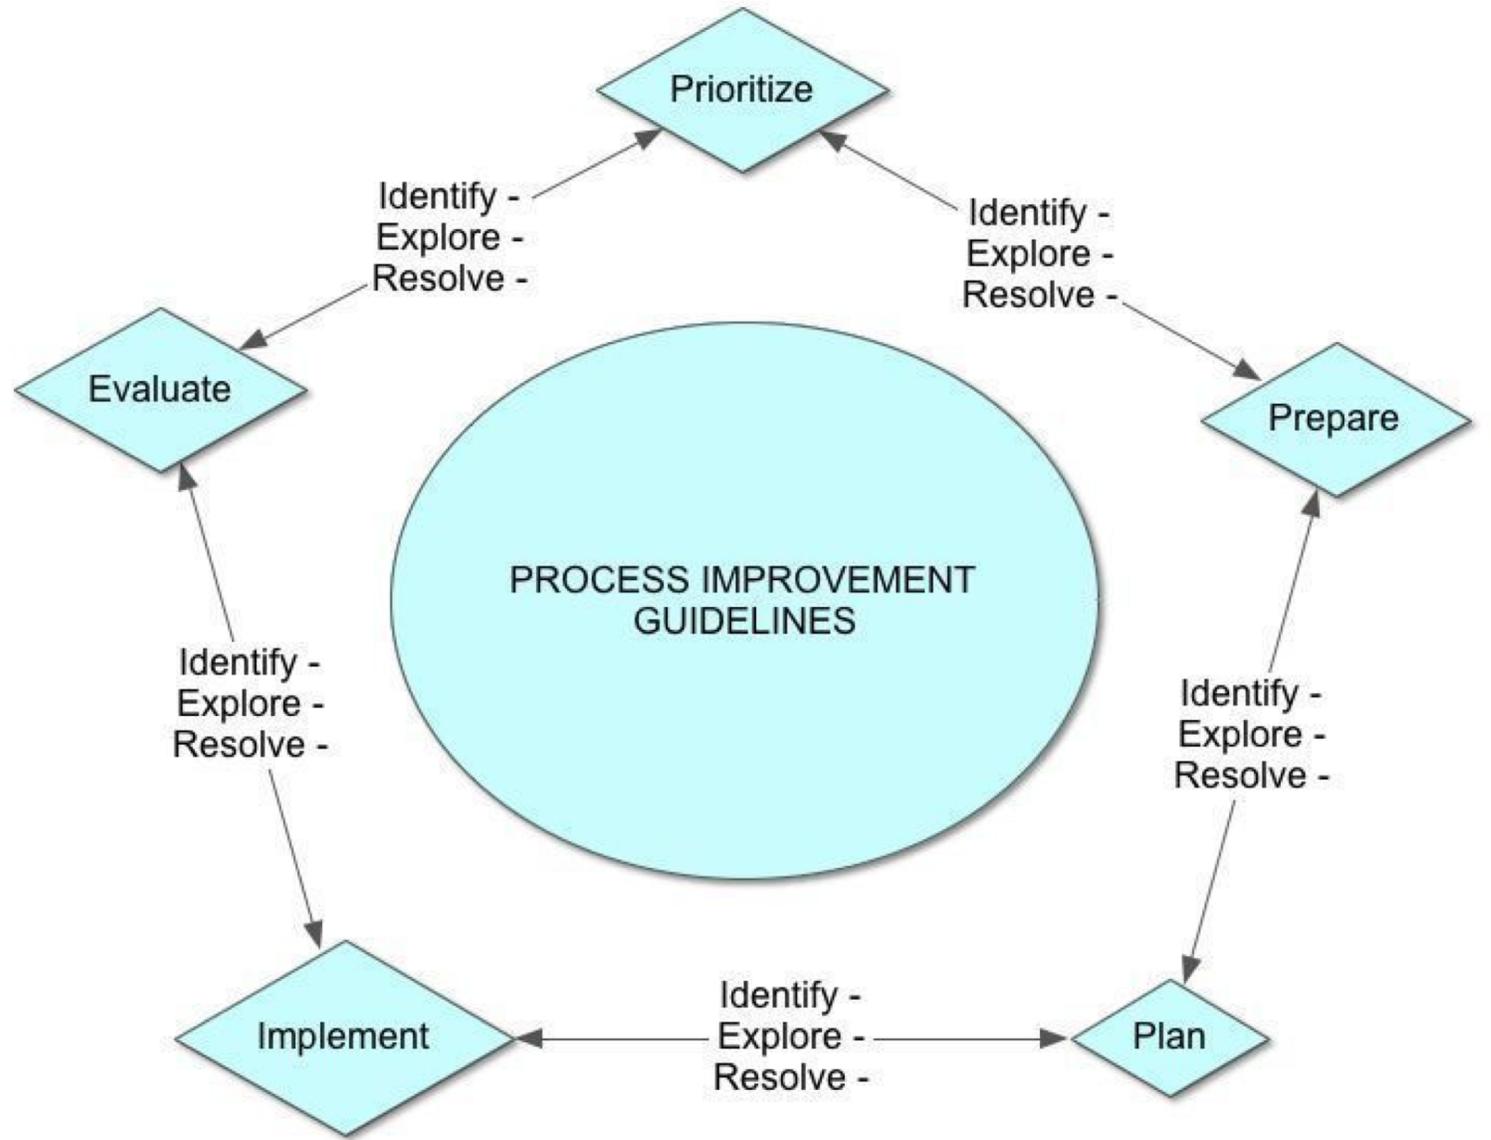

VS Results for 4 administration of Data for Heterogeneous Group over time (R)

	Admin 1	Admin 2	Admin 3	Admin 4
Group A	0	0	0	0
Group B	0	0	0	0
Group C	0	-1	0	0
Group D	0	0	+1	+1
Overall	0	0	0	+1
